LEGEND - ភ្នំពេញ

On this map a LANE is considered as being a minimum of 2.4 m (8 feet) in width—**វិថី** (Lane) **ត្រូវបានគេ ប្រើ ជា វិថី** (Lane)

Dense forest or jungle indicates more than 25 percent of ground is concealed by canopy with undergrowth generally impassable on foot.

Clear forest indicates more than 25 percent of ground is concealed by canopy with undergrowth generally passable on foot.

In areas of dense or clear forest overprinted with bamboo symbol, the vegetation is predominantly bamboo. Vegetation classified by field observation and office identification from aerial photography.

Areas symbolized as land subject to inundation are generally flooded during July-December. Other areas may be flooded for shorter periods.

The number in parentheses following a village name indicates that more than one village is so named—**លេខ** (Number in parentheses)
