Example of Destroyed Village near Darurja
(180 of 240 structures destroyed)

Example of Destroyed Village near Fata Borno
278 structures destroyed

The 23 Fur villages in the Shataya Administrative Unit have been completely depopulated, looted, and burnt to the ground (the team observed several such sites driving through the area for two days). Meanwhile, dotted alongside these charred locations are unharmed, populated, and functioning “Arab” settlements. In some locations, the distance between a destroyed Fur village and an “Arab” village is less than 500 meters.
